

The local health and safety solution for your business

Bennett Staff has built a reputation for a quality service, which is why, when we come across someone with the same dedication to local businesses, we like to tell people about it.

Stallard Kane Associates Ltd (SKA) works with clients all over the UK but has extensive experience with all types and sizes of business in this area. They understand that busy management teams don't always have time to stay abreast of changing employment legislation or health and safety policies, but know that not having a full understanding could lead to costly employment tribunals and HSE prosecutions.

We've teamed up with SKA to offer tailored health and safety and HR services, which are continuously reviewed and updated to ensure your business is fully compliant. It's the ideal, cost-effective alternative to employing a H&S or HR Manager, with the added benefit of being a 24hr service.

How it works

SKA will meet with you to discuss your requirements and design a package(s) built around your business, instead of an off-the-shelf solution, supplying you with all the relevant handbooks, documents, contracts and risk assessments your business needs.

If you'd like to know more, please contact Amanda Modev at Stallard Kane Associates Ltd on 07837 408 759 or amanda@skaltd.co.uk

StallardKane
